

Testo 252 Measuring pH, temperature and conductivity

- Can be used on location or in the laboratory
- Simultaneous measurement of pH value, temperature and conductivity
- Cableless printing of the measured values via infrared printer.
- Online PC measurement for several hours or days.
- Uncomplicated data analysis on PC using windows software

Measuring range : -2 to 16 pH

Accuracy : + 0.01 pH

Operating temperature : 0 to + 50 0C

- Auto. Temperature compensation for natural waters.
- Auto. Change-over of measuring ranges
- NaCl (TDS) calculation
- Can be calibrated with every conductivity standard.
