

Testo 475 Non-contact measurement of rpm and oscillation

The convenient mini stroboscope for many different applications.

- Measurement of rpm of fans, motors, rollers etc.
- Oscillation measurement
- Process monitoring
- Slip recognition in couplings
- Measurement of rpm of drilling machines

| | |
|------------------------|--|
| Sensor: | Flash light transmitter or mechanical sensor |
| Measuring Range: | 20 to 20 000 rpm 0.167 to 333 Hz |
| Accuracy: | + 1 digit in all ranges |
| Flashlight transmitter | |
| Measuring Range | 100 to 20 000 rpm 1.67 to 333 Hz |
| Accuracy: | + 1 digit in all ranges |
| Mechanical sensor | |
| Measuring Range | 20 to 20 000 rpm 0.33 to 333 Hz |
| Accuracy: | + 1 digit in all ranges |
